Introduction

The IT industry worldwide has been experiencing an unprecedented growth. The information technology has proliferated in every walk of life simplifying the processes and bringing about transparency and thereby making life easier to a common man. We are moving from Steam engine to Search engines and from bullock carts to Cyber marts.

*The advent of Internet has changed the total business outlook. It has brought the **death** of distance and instead we are experiencing the **depth** of distance. There seems to be a paradigm shift which is evident from the fact that it is spawning new models and designs of Business and still newer models to manage them. Today knowledge management is imperative and not an option to survive in an era of Global competition.*

The access to information has been much easier today than it has ever been in the history. The technological advancement has carved itself a niche thereby acquiring a competitive edge in the market. We at JIN INFORMATION SYSTEMS PRIVATE LIMITED have realized the market and its realities and have focused our efforts to deliver innovative quality products and services for the domestic and international market.

Background

JIN Information System Private Limited, is an ISO-9001:2000 Certified Software Development and IT Services company, established in the year 1998 by a team of experienced and qualified IT professionals. The company is promoted by Japanese promoters with a base in Bangalore, India and a Marketing office in Tokyo, Japan. Since its inception JINIS has been steadily growing into a leading Global provider for software development and consulting services and business process outsourcing. JINIS is committed to maintain highest quality standards and ensuring consistent, on time delivery of reliable software solutions and services, in accordance with client's preferences.

HR Policy

We at JINIS strongly believe that one of the greatest assets in an organisation is its human resource and the endeavour is to always keep the morale of the team very high. The company has a management team built on strong skill-sets both in technical and marketing and most of all it is built on trust and confidence. We believe that every small achievement needs to be recognized and rewarded. Based on this principle, today we have a well charted career plan to all our employees. We strongly believe in recruiting the right kind of people and retaining them. We believe that "***it is always in give and take atmosphere ideas are refined and perfected***".

The Team

JIN has high end technical members and directors with decades of experience in establishing and running organisations successfully, managers who work with ground realities of the business in mind, planners and strategists who can see the future in the trends and project operations and growth which are 100% workable and practical. The top end of the company comprises of Mr. Alexander Varkey (CEO and Managing Director), Mr. Kouchi Suzuki (Chairman) and Mr. Narikyo (Director).

The technical team has motivated, qualified and highly efficient young engineers with an average experience of five to six years. The team is very cohesive and the environment is friendly that helps all of us share our thoughts without hesitation. Each project is lead by a team leader who has good social and professional rapport with his/her team members. The groups are divided into various verticals according their specialisation.

- 🕯 Microsoft Group
- 🕯 Java Group
- 🕯 Open source Group
- 🕯 Mainframe Group

We at JIN believe in continuous development, improvement and development in all the activities at work. We are always in the pursuit of achieving newer heights in terms of the quality of work and deliverables which in turn will result in greater satisfaction for the work force and growth in their intellectual capabilities. We have a technically strategic group called "***Core Engineering Group***" primarily supporting all the technical activities in improving the throughput and making the approach efficient for the rest of the work force. The CEG imbibes new technologies and percolates it down in the organisation. It also helps the people in optimising their effort at work and hence making our deliverables more robust, efficient, scalable and usable in the real life.

In the marketing department we have "***Business Intelligence Group***", which is our eyes and ears to the market. We get in-depth information about the market trends and activities happening in the various avenues, which helps us strategise on our future activities.
